

Cognac's Corner Magazine

Celebrity Gossip & Fashion

Hello darlings, welcome back to Cognac's Corner Magazine.

The Champagne was pouring and delicious delicacies were being served as the social set of Manhattan arrived yesterday evening at Bruno Jamais Restaurant to celebrate the launch of Hairmax LaserComb.

I had a chance to meet and talk to many exciting individuals who enlightened me about this fabulous revolutionary new product. I briefly interviewed Founding Surgeon and Medical Director for Medical Restoration, Dr. Matt L. Leavitt who explained the benefits of this astounding new product which is presently breaking new ground.

He briefly discussed that the HairMax LaserComb was designed and developed in Australia and is manufactured in the USA under strict quality oriented standards. The LaserComb is also patented in the USA with additional patents pending around the world.

Dr. Matt L. Leavitt and Cognac

The founding Director Henry Pearl was a pioneer in the use of laser technology at a leading skin and hair care clinic and research center in Sydney, Australia from as early as 1986.

In Australia, Mr. Henry Pearl developed and sold a single laser probe for the hair, which has been selling productively to clients for self-care use since the 90's. The average sale price was A \$2000. Client satisfaction was significant.

The energy parameters we chose for use in the HairMax LaserComb are the result of years of observing and analyzing the effects of lasers on thousands of individual cases. This is supported by research program, as well as ongoing studies of related clinical trials of hair lasers around the world

There have been over 3,500 positive scientific studies of Laser PhotoTherapy (Low Level Laser Therapy) published internationally to date. In 2003, an independent report by the Hair and Scalp Clinic of Clearwater, Florida was published in a peer reviewed medical journal. This landmark study demonstrated the correlation between LaserComb use and positive benefits to users.
