

DERMASCOPE

The Encyclopedia of Aesthetics & Spa Therapy

The Knu line of anti-aging products is designed to address the challenges of fine lines, wrinkles, and other signs of premature skin aging by using active ingredients known for their significant skin-healing, regenerating and repairing properties. Ingredients include: epidermal growth factor (EGF), second generation tri-peptides, alpha hydroxy acids, dimethylaminoethanol (DMAE), and the South American beauty secret, snail serum. www.michaeltoddtrueorganics.com
